EXECUTIVE SUMMARY

Technical and Product Engineering Leader with 17 years of experience delivering transformational applied AI systems, large-scale digital architectures and enterprise data platforms across safety-critical global industries. Global career working at Oil & Gas supermajor operations in Upstream Engineering, Automotive engineering, Heavy engineering and FMCG. Proven record of orchestrating OT/IT backbones and line-managing global teams of engineers and tier-1 vendor squads holding an MBA in addition to multiple Technology, Agile and Project Management credentials.

WORK EXPERIENCE

BP
Principal Product Manager
May 2023 – Present
UK
USA
Middle East
Africa
India

*Governed product strategy, line management, capital allocation, and change across a **$20M+** tools & technology portfolio transforming Upstream asset operations. Optimized and reduced technology operating costs by $30M YoY while unlocking **$300M+** in total engineering value.*

Select leadership highlights

Transformation & New Value

- Productionized in-house LLM leveraging Graph RAG, indexing 20+ years of engineering standards, technical deviations, and multi-asset feedback also enforcing deterministic guardrails and benchmarks to eliminate hallucinations and semantic drift, unlocking **$100M+ in reliable information discovery value**.
- Directed the launch of e-Assurance for Safety & Operational Risk (S&OR), changing audit reconciliation & reporting cycle times, liberating 15k+ auditor hours to deliver **$3M+ in Opex savings** while establishing 100% digital traceability and real-time barrier risk analytics.

Change & Global Deployment

- Led the end-to-end transformation lifecycle from business vision, market analysis, vendor selection through to pilot and global rollout and curating an AI ingestion layer. Directed enterprise-wide change management across all engineering disciplines to transition 10,000+ global users from document-centric governance to dynamic, deviation-led workflows, to deliver **~$30M in operational efficiencies**.
- Directed the multi-basin completion of the **~$35M+ Asset Lifecycle Information Management** (ALIM) ecosystem, taking over mid-flight to finalize rollout across all global upstream assets and downstream refineries. Rationalized disconnected processes and licensing footprints into a standard asset data model, transitioning the enterprise rollout into sustain and delivering the trusted data fabric required for BP's centralized Digital Twin.

Modernization & Consolidation

- Scaled Palantir adoption, transitioning data pipelines across integrity, inspection, anomaly, and engineering asset domains. Developed migration and schema-mapping tools on Palantir to transform legacy datasets into ISO data standards, delivering **~$12M in Capex avoidance.**

BJSS Consulting
Principal Consultant
Mar 2021 – Apr 2023
UK

Led consulting teams for Technology Delivery across Oil & Gas clients

- **Digital Factory:** Championed critical delivery streams within BP's enterprise Digital Factory rollout, driving the shift from legacy waterfall methods to agile ways of working. Coached and aligned multi-vendor teams to the Scrum framework accelerating time-to-market and preventing over **$50M+ in projected CAPEX write-offs**.
- **Asset Integrity Management:** Spearheaded the rapid multi-basin rollout of the commercial Anomaly Assessment & Tracking (AA&T) platform across 22 operating assets in 7 global regions across all integrity disciplines. Accelerated time-to-value by deploying the enterprise solution within 50% of the expected timeframe, capturing **$15M in enterprise licensing savings.**

Informa PLC
Head of Technology
Feb 2018 – Feb 2021
UK

- **Citeline by Norstella (Pharma):** Delivered industry-first predictive AI platforms forecasting clinical trial and drug development trends using complex regulatory and clinical datasets in an **£8M+** technology portfolio.
- **Informa Tech, Omdia (Digital Marketing & Research):** Led technology consolidation for various M&A and rebranding programs overseeing 200+ digital applications under GDPR/CCPA regulatory governance.

Capgemini
Senior Manager
Jun 2014 – Nov 2017
UK & India

- **Procter & Gamble (FMCG):** Led technical product design and enterprise architecture for core commercial and supply-chain applications; overhauled test automation frameworks to achieve >90% automated test coverage.
- **General Electric (Semiconductor Engineering):** Led complex technical upgrades and multi-database migrations for enterprise Product Lifecycle Management (PLM) applications.

L&T Technology Services
Engineering Lead
Dec 2008 – June 2014
UK & India

- **Jaguar Land Rover (Automotive):** Led engineering software squads implementing PLM systems and digital engineering workflows for vehicle manufacturing processes.
- **Indian Navy (Defence & Heavy Engineering):** Architected and developed secure backend database systems for mission-critical, high-integrity naval defense applications.

ACADEMIC CREDENTIALS & CERTIFICATIONS

- **Education:** MBA – Quantic School of Business & Technology (2022) | Bachelor of Engineering (Distinction) – North Maharashtra University (2008)
- **Technical Certifications:**
  - Palantir Foundry Certified
  - AWS Certified Cloud Practitioner
  - Sun-Certified Java Programmer
- **Management & Agile Credentials:**
  - Project Management Professional (PMP)®
  - PRINCE2® Practitioner | Management of Successful Programmes (MSP®)
  - Leading SAFe® 5.0 | Professional Agile Leadership (PAL)
  - Certified Scrum Product Owner (CSPO) | Certified Scrum Master (CSM)
